Electronic Voting on the House Floor

Here’s what eligible voters need to know to vote during the House of Delegates meeting when the Speaker of the House calls for an electronic vote:

• When called for, electronic voting clickers will be used for voting. **Press 1 for YES, and 2 for NO.**

• You will see your response appear on the LCD display screen. You can change your response up until voting closes by making another selection. The Speaker of the House will announce when voting has closed.
